

National Parking Platform Pilot

Introduction

Smart Parking Deployment

In Practice, the challenge for parking operators (especially local authorities) is that they must integrate disparate systems in order to fulfil their policies and objectives.

The National Parking Platform uses the Alliance for Parking Data Standards (APDS) protocols to enable operators to integrate services and equipment to create a better environment for their localities and customers as well as developing sustainable transport options for the future.

The NPP is a Department for Transport funded initiative.

Parking Operators

Customers

"Customer" Relationship

Exclusive
Fixed Term Contract

Payment

Customer
"Relationship"

Current situation:

Direct contract between Operator & Service Provider

Service Providers

The Benefits of an Open Market...

- Additional and predictable investment – securing long term access to the market
- Drive improved revenue stream(s)
- More coverage/enhanced footprint
- Increased usage*
- Enhanced focus on the consumer - innovation and providing a quality service

Suppliers benefit

Operators benefit

Motorists benefit

- Happier Visitors / Residents
- Increased digital parking
- Cost savings (even cost removal)
- Reduced procurement
- More innovation
- Better and enhanced data provision
- Potential for integrated solutions

- More choice
- Ability to use their favourite app
- Greater ease of use
- More innovation driven through competition for the consumer
- Resilience

The NPP creates the Multi Vendor environment...

A platform makes open market sustainable

What is the National Parking Platform?

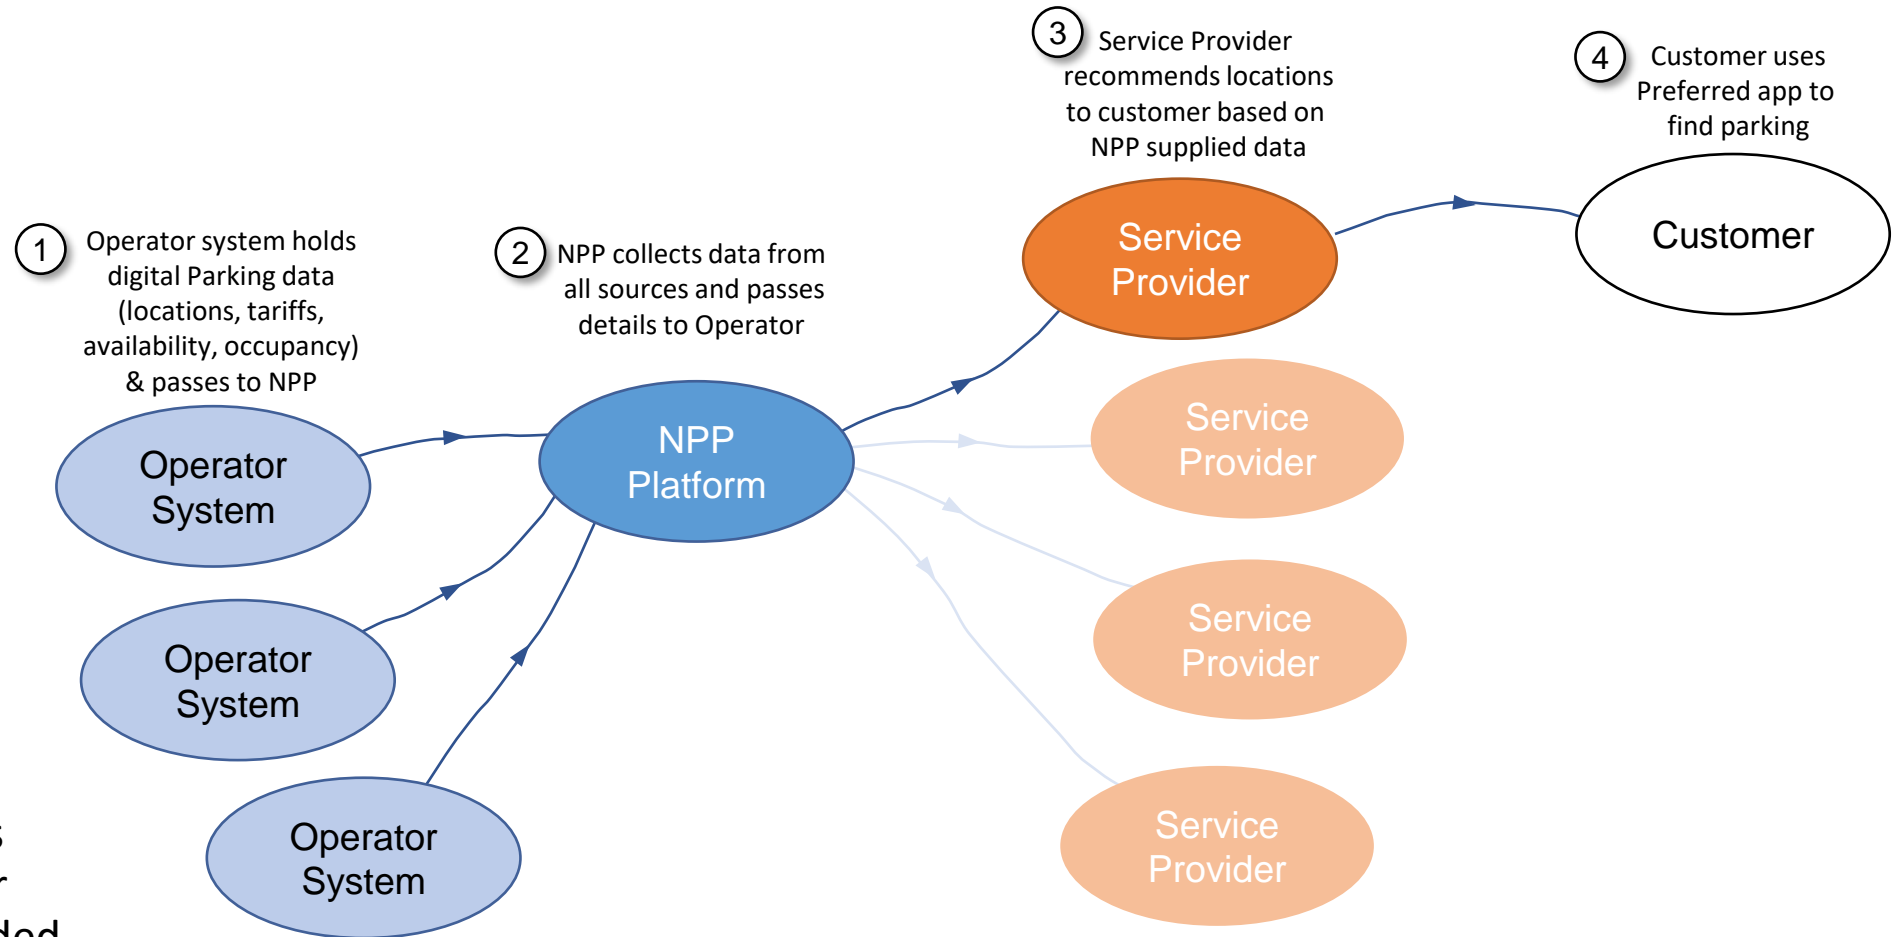

- **A contract manager**
- **A data exchange**
- **A payment clearing house**

What is the National Parking Platform?

- **A collaboration between central and local government (with private sector involvement)**
- **Publicly owned**
- **Not for profit**

The NPP supports digital publishing

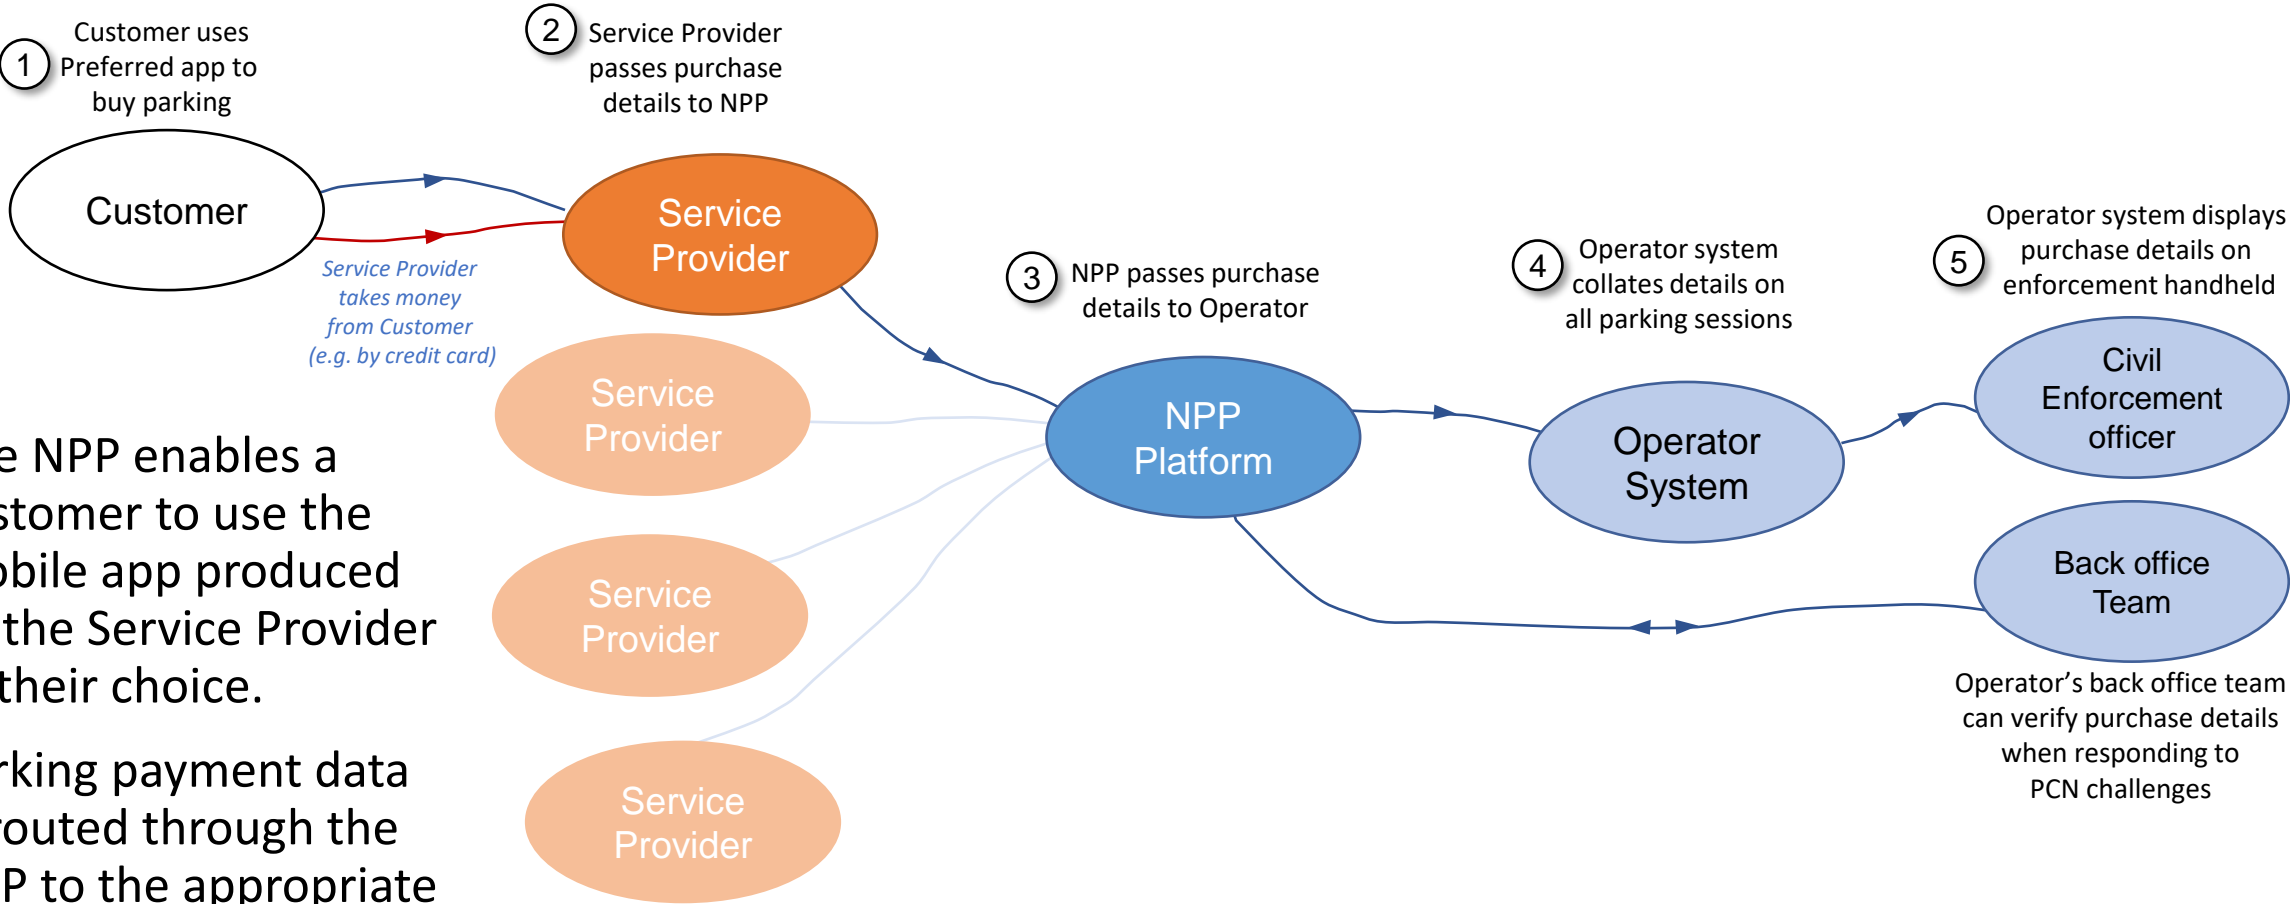

The NPP enables a customer to use the mobile app produced by the Service Provider of their choice.

Parking availability is sent to the customer based on data provided by operators.

How the NPP enables multi-vendor payment

The NPP enables a customer to use the mobile app produced by the Service Provider of their choice.

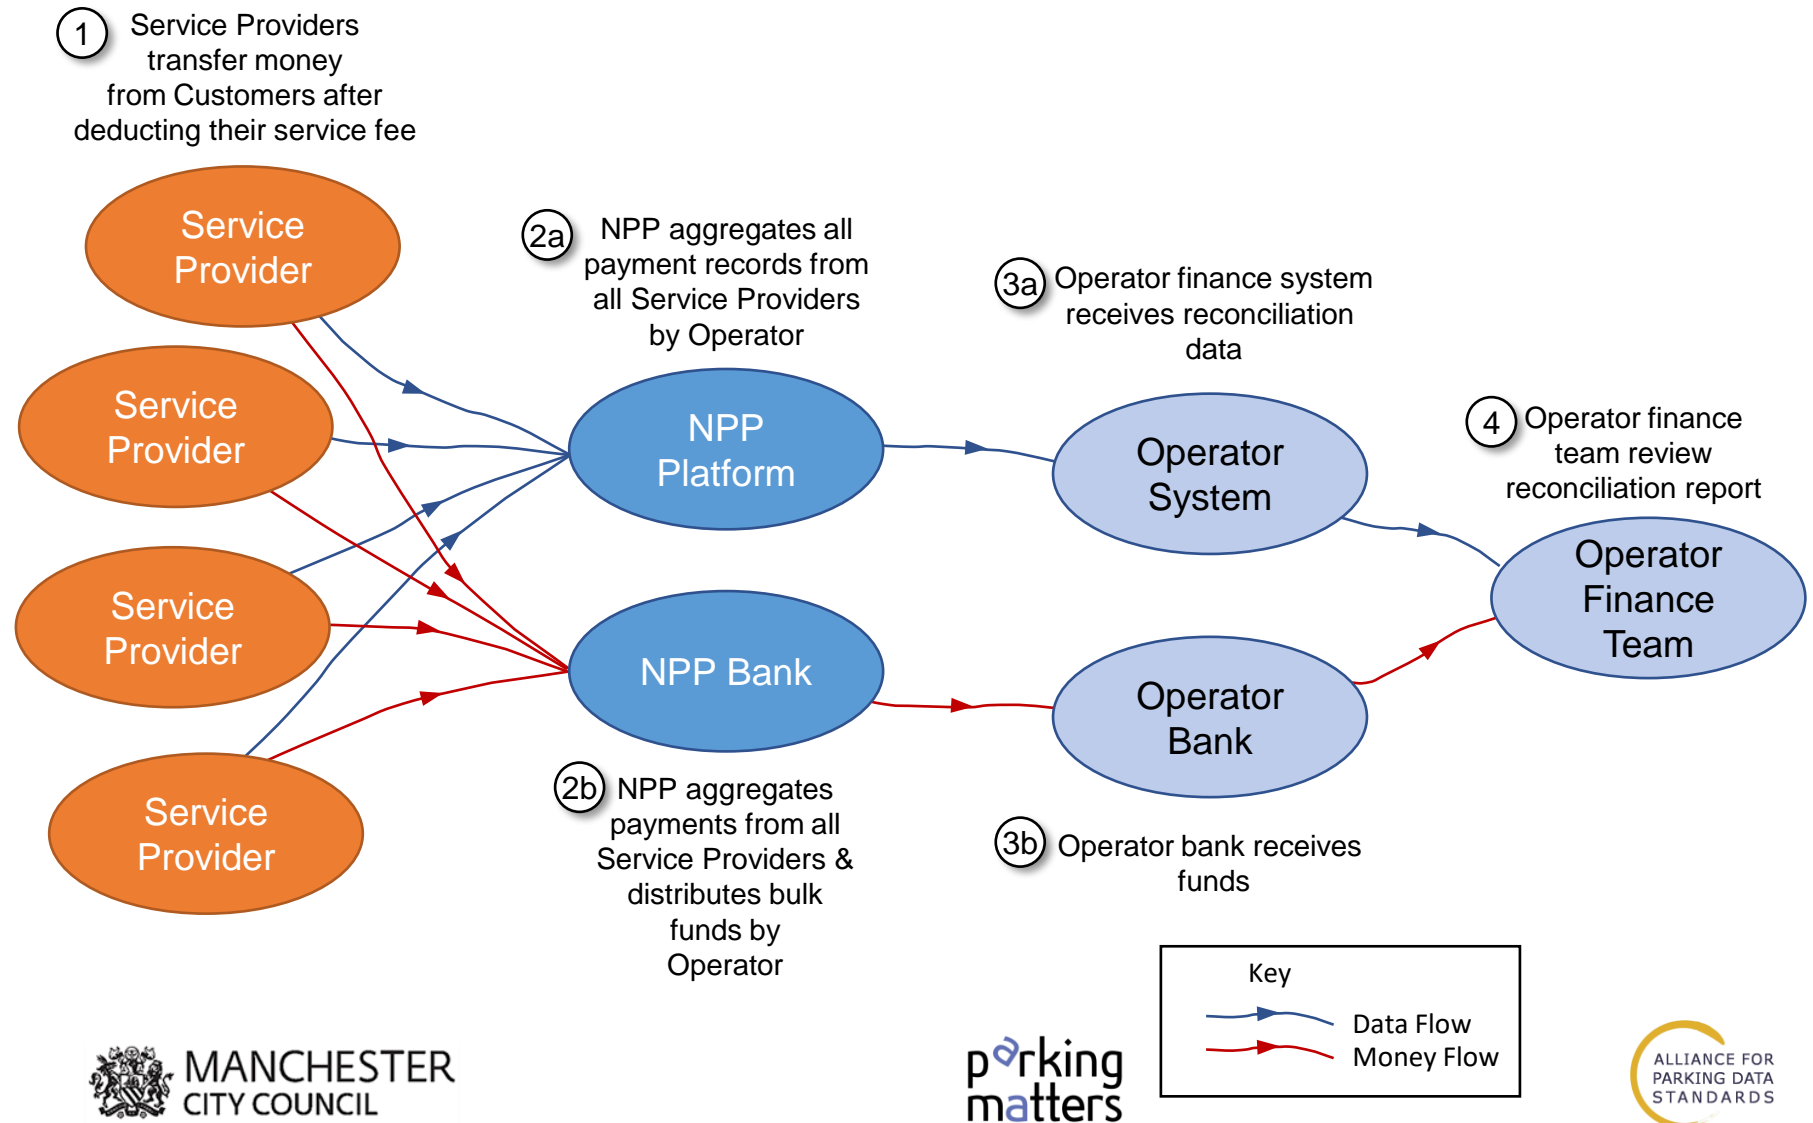

Parking payment data is routed through the NPP to the appropriate operator.

NPP simplifies funds transfer and reconciliation

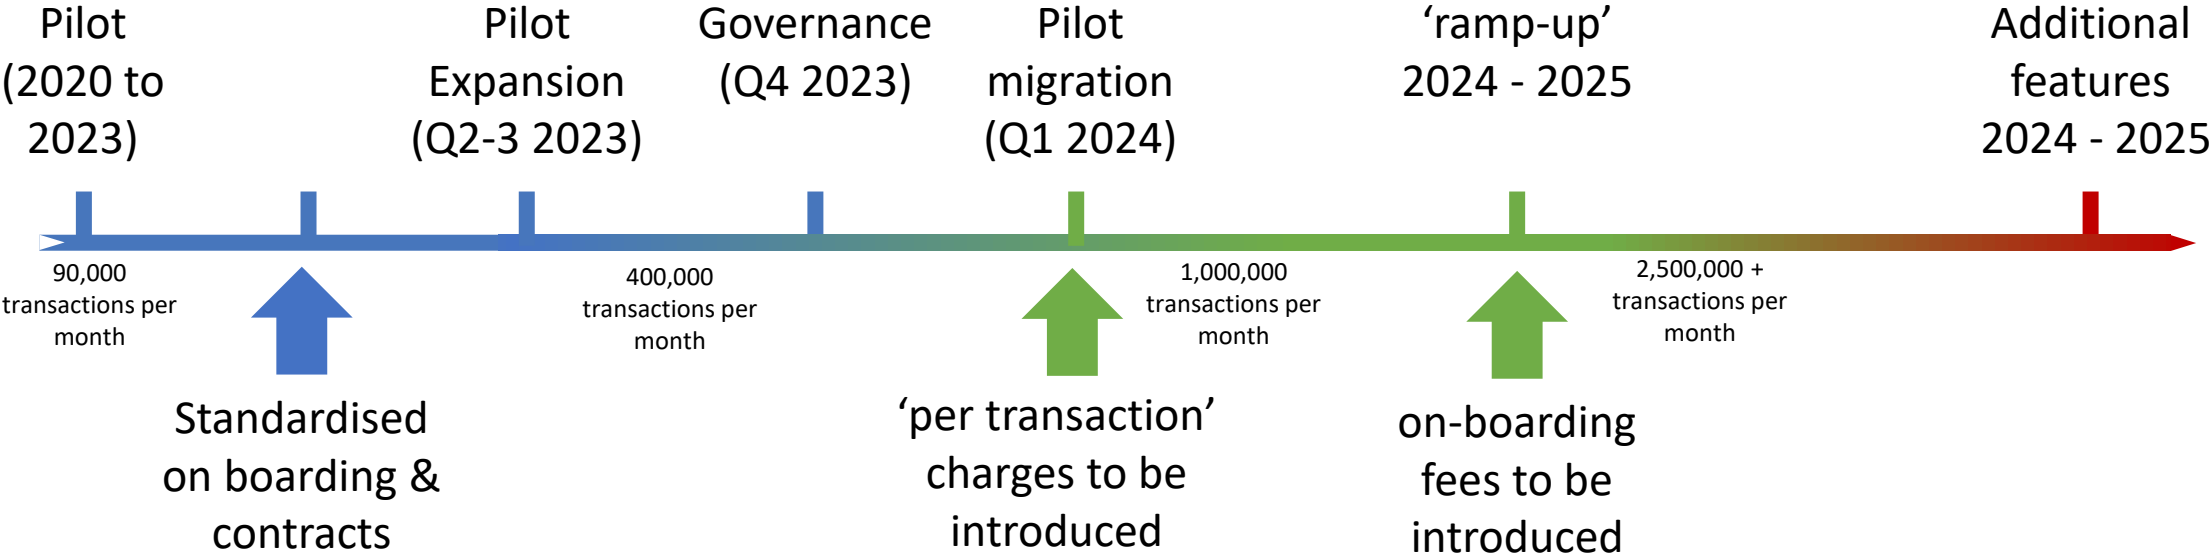

All payments made through the NPP are aggregated and sent on to the relevant operator.

The NPP supplies all the data required to reconcile parking payments against amounts received.

Delivering the NPP

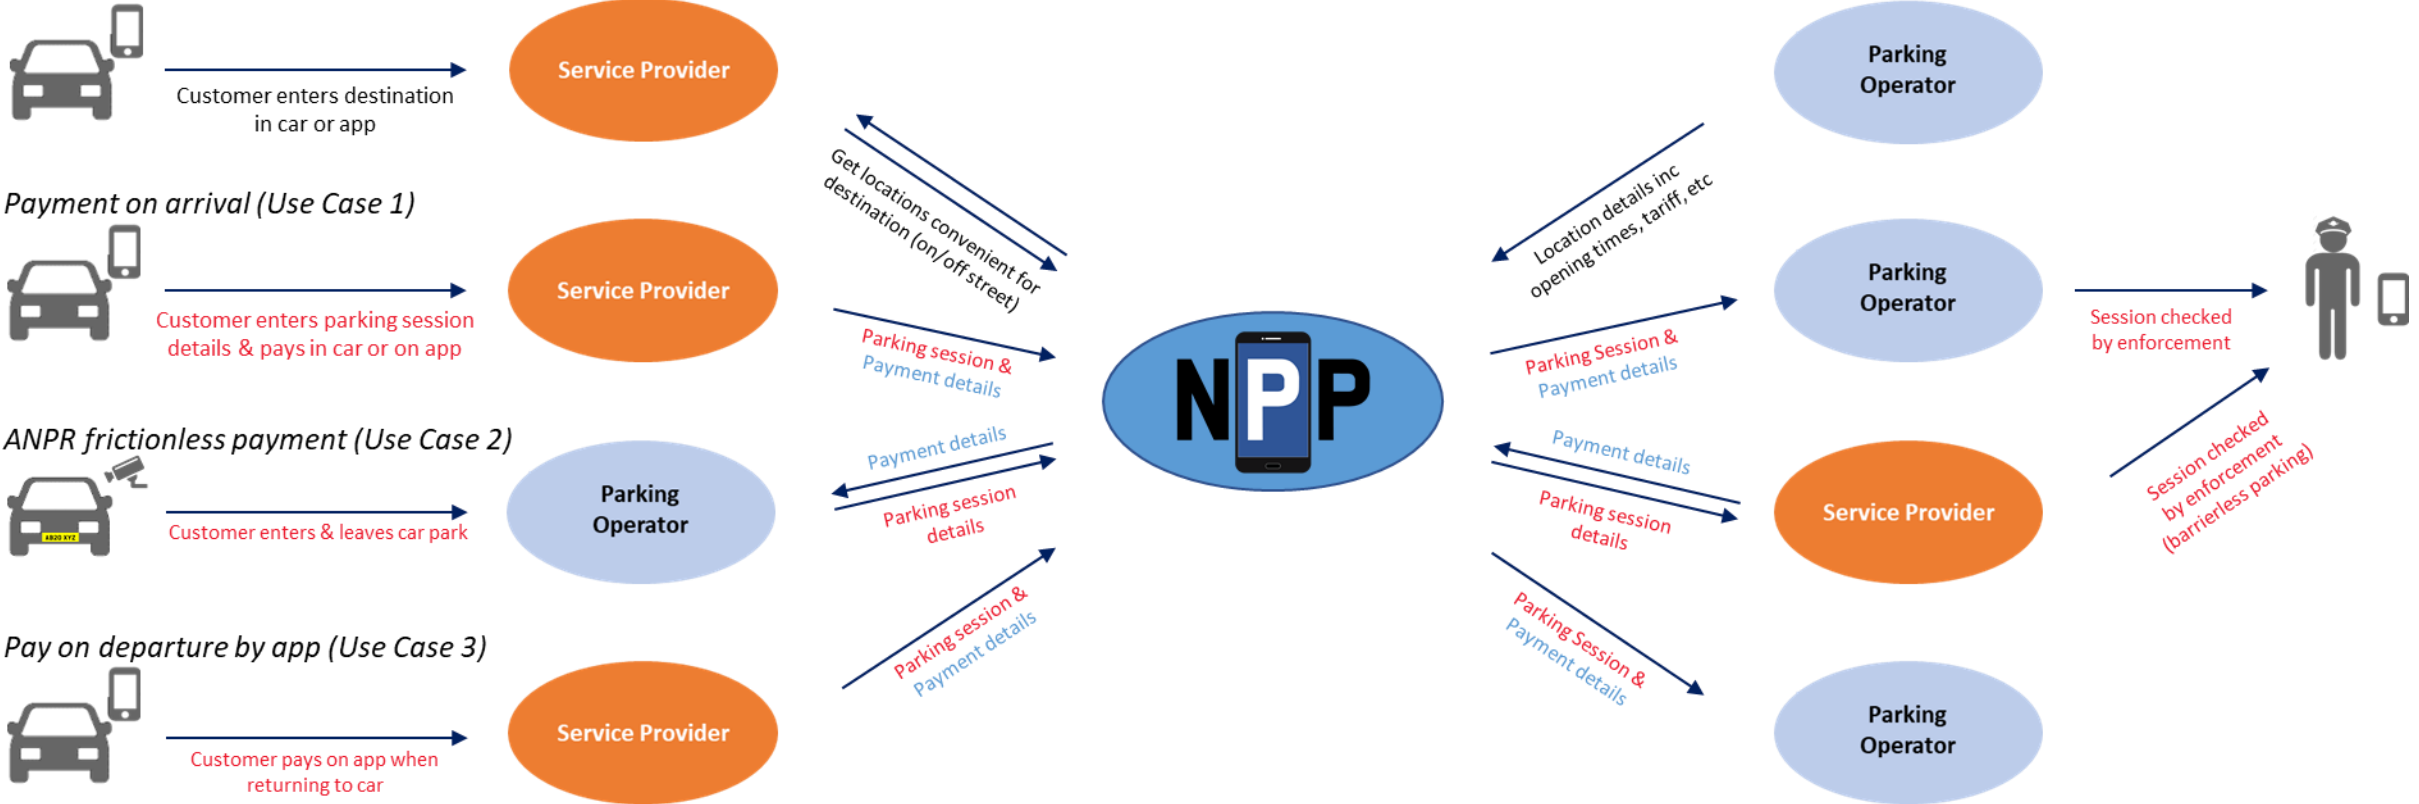

NPP Pilot Use cases

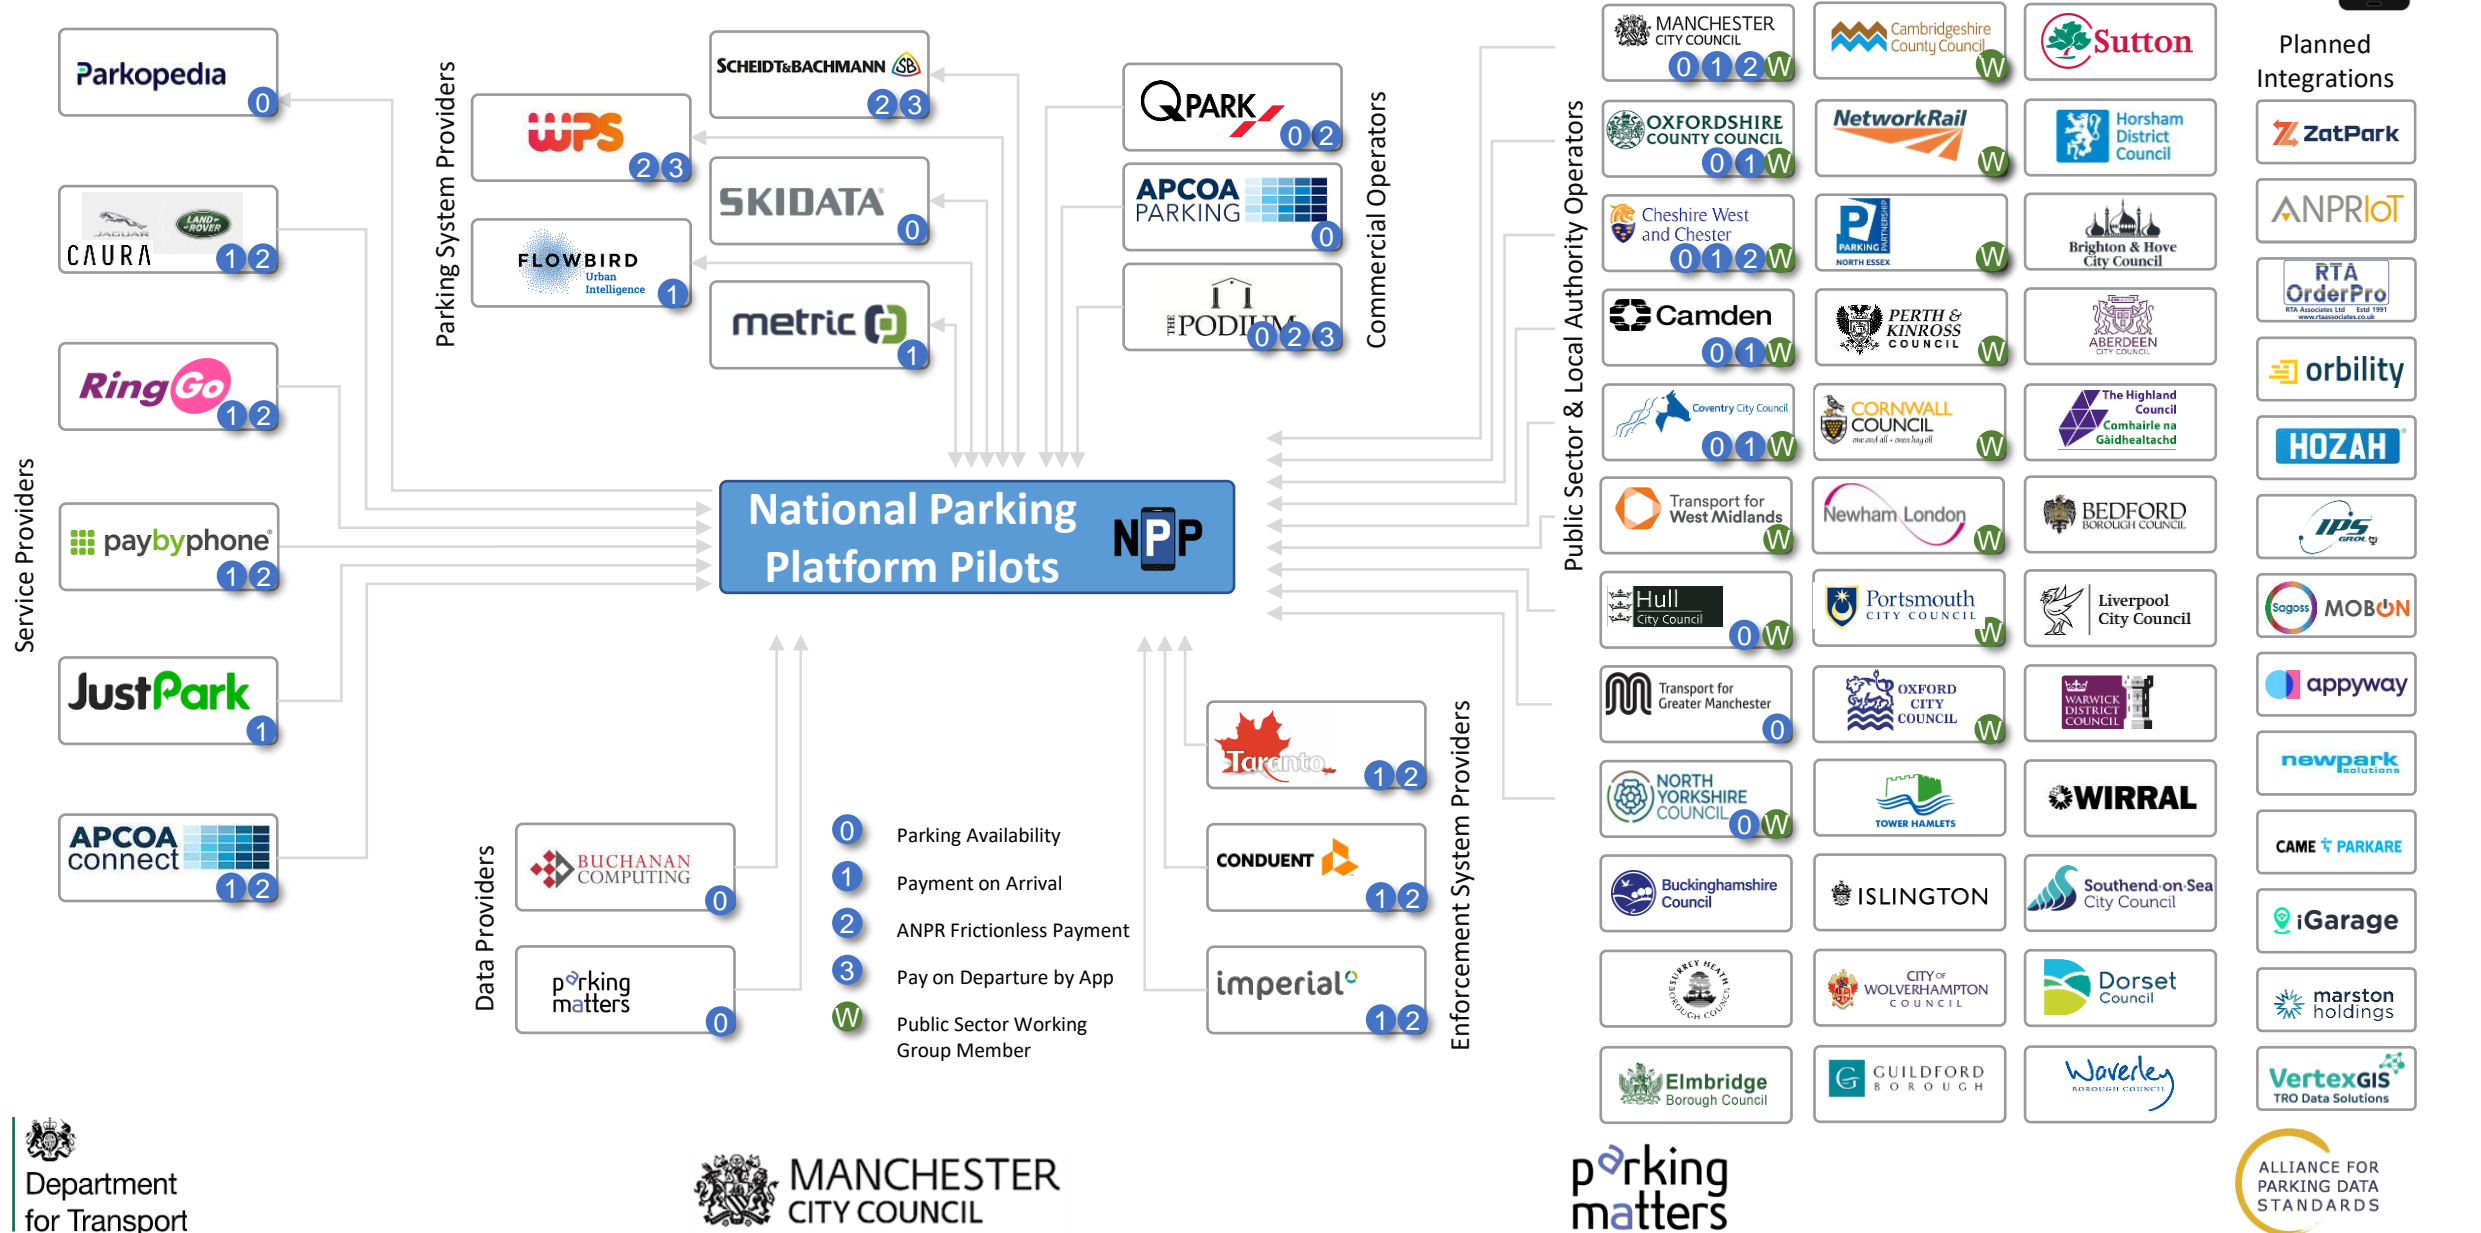

The NPP Pilots demonstrate the three most common use cases. NPP pilots are supported by Manchester City Council. The use cases link the end customer and parking operator through a “Service Provider” (OEM platform or a customer account). Customers can access parking offered by any operator on the platform, paying through their Service Provider account.

Introduction and application pack...

Contains all the information you need to get started including:

Briefing Note a short background to the NPP, the benefits and risks (including mitigation)

Standard Service & Data Protect Agreements for review

Local Authority Operator Questionnaire asks for all the details we will need to get started.

Sample Project Plan & Task Flowchart

Locations and Operator Details Spreadsheets showing what we will need to share with the Service Providers

More details from our website...

The screenshot shows the homepage of the National Parking Platform (NPP) website. A callout bubble points to the address bar showing 'npp-uk.org'. Another callout bubble points to the NPP logo, which consists of the letters 'NPP' with a smartphone icon integrated into the letter 'P'. The website layout includes a blue header with the 'National Parking Platform' name and a search bar. A dark sidebar on the left contains a list of 13 items. The main content area features the title 'National Parking Platform', a subtitle 'NPP – A Brief Introduction', and a paragraph of introductory text followed by a numbered list of four points.

1. NPP Pilot Outline

2. NPP Pilot Phases

3. Pilot Use Cases

4. Sample Flows

National Parking Platform

NPP – A Brief Introduction

Payment for parking is lagging behind developments in other markets and industries. Parking customers, both on-street and in car parks, face a fragmented market offering a wide variety of payment options making the simple act of parking and paying complex and confusing as options are dependent on where they want to park and which payment app they have (or don't have). The National Parking Platform (NPP) is a local authority owned and DfT funded pilot project that brings customer experience into the 21st century by facilitating data exchange, digital payments, and a new way of delivering better parking and mobility services. In essence, the NPP:

1. Provides a simplified and improved customer journey from start to finish for the end-customer
2. Creates a centralised and cost-efficient system supplying data to councils that can inform present and future strategic decisions
3. Enables a competitive, innovative market by allowing systems to communicate with each other via open data standards and interfaces (APDS/ISO TS 5206-1)
4. Is a publicly owned, not for profit, national facility that enables Parking Operators (public and private) to communicate digitally with Service Providers.
